beginning in October 2017 the national academies of sciences engineering and medicine organized a set of workshops designed to gather information for the decadal survey of social and behavioral sciences for applications to national security the first workshop focused on changing sociocultural dynamics and implications for national security and this publication

summarizes the presentations and discussions from this workshop

the purpose of this 2006 book is to present non invasive methods of measuring the biological responses to psychosocial stress in humans in non laboratory field settings following the pathways of seyle s general adaptation syndrome the text first describes how to assess the psychosocial stressors of everyday life and then outlines how to measure the psychological behavioral neurohumeral physiological and immunological responses to them the book concludes with practical information on assessing special populations analyzing the often complicated data that are collected in field stress studies and the ethical treatment of human subjects in stress studies it is intended to be a practical guide for developing and conducting psychophysiological stress research in human biology this book will assist students and professionals in designing field studies of stress

the rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety yet a major influence on the safety quality and effectiveness of home health care will be the set of issues encompassed by the field of human factors research the discipline of applying what is known about human capabilities and limitations to the design of products processes systems and work environments to address these challenges the national research council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices technologies and care practices into the home its goal is to lay the groundwork for a thorough integration of human factors research with the design and implementation of home health care devices technologies and practices on october 1 and 2 2009 a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices technologies and care practices into the home this book is a summary of that workshop representing the culmination of the first phase of the study

systematic methods for analyzing culture is a practical manual that provides step by step instruction for collecting and analyzing cultural data this compact guide explains complex topics in straightforward and practical terms via research examples textual and visual software guides and hands on exercises through each chapter s introductory examples the manual illustrates how socially learned knowledge provides group members with shared understandings of the world which allow for mutually intelligible interactions the authors then carefully walk readers through the process of eliciting those socially learned shared and thus cultural representations of reality which structure the thinking and practice of

individuals inhabiting social groups specifically the book shows how researchers can elicit such thought and behavior via methods such as free lists pile sorts cultural consensus and consonance analysis textual analysis and personal network research the book will help both undergraduate and graduate students identify ways to unpack the black box of culture which may be absent or given only cursory attention within their training and respective fields the book s clear and systematic step by step walkthroughs of each method will also encourage more established researchers educators and practitioners from diverse fields and with varying levels of experience to integrate techniques for assessing cultural processes into their research teaching and practice
